SIMPLECLEAN Primary Products

GEN3 Features

- New backlit logo has changing colors to indicate idle, running or error states of machine.
- Black powder coated top replacing decals
- All panel screws have been standardized to be the same size and have re-enforced attachment points.
- Larger 10-inch large touchscreen across all machine sizes, 30lb, 40lb, 60lb, 80lb.

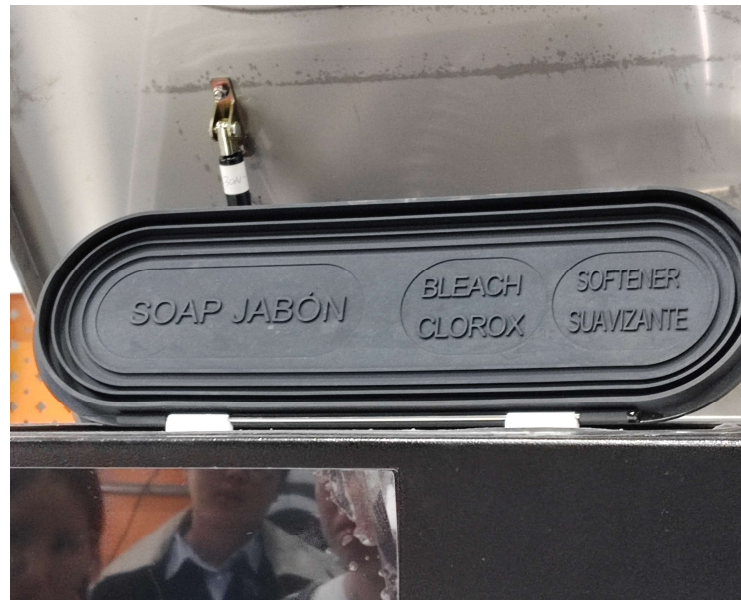

Faster Installation & Easier maintenance

- Large lower panels on front and rear of machine allows easier access to critical components without removing the entire front or rear panels.
- Quick removable shipping bars held in place with snap pins allowing for easier and faster installation.

Easy to understand soap box

- Top soap box is clearly labeled in English and Spanish for 30lb & 40lb machines.

Easy to access soap box for large machines

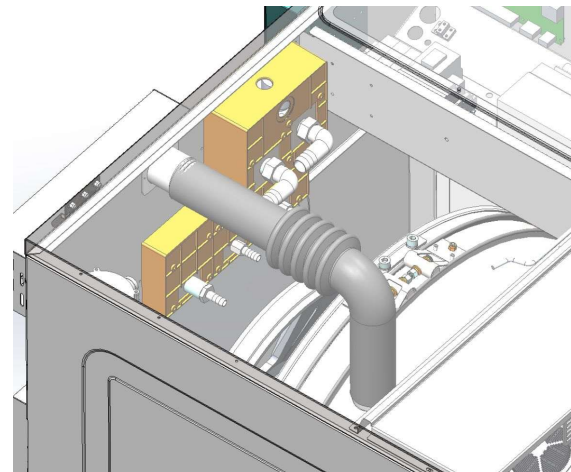

- Top soap box is located on the front of the machine for taller 60lb & 80lb machines eliminating the need for step stools

Externally accessible water valves

External water valves allowing for easier maintenance when necessary and keeps water external to the machine protecting critical internal components if leaks do occur.

Additional water protections added

Waterproof protection added to protect critical electrical components.

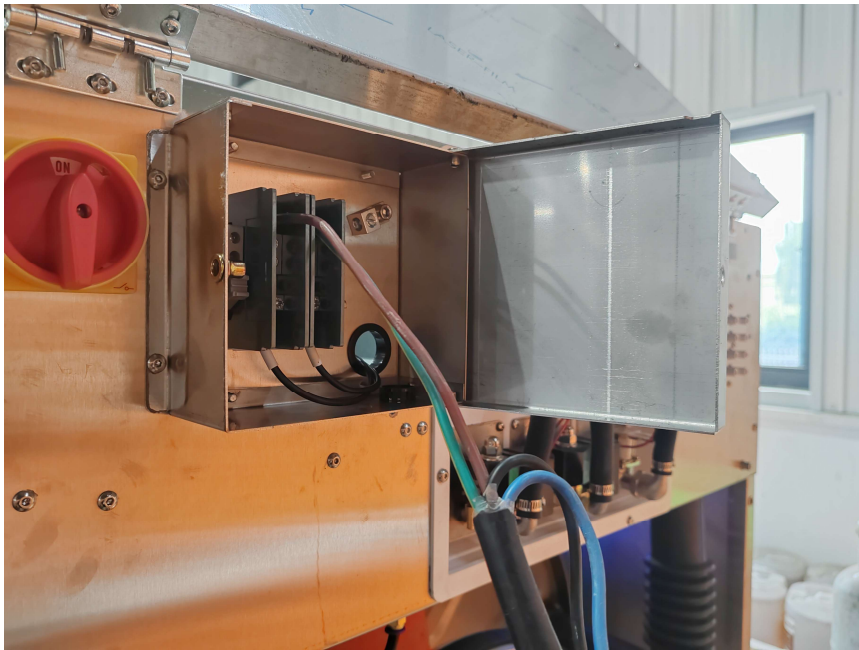

Waterproof protection for sensor

Transparent water protection over electrical components

Electrical connections moved

Electrical connection points moved to rear of machine allowing for easier setup and maintenance.

Coin upgrades

- Can use Greenwald, ESD, Kiosoft coin boxes
- Two coin drop options available
 - New US .25 style coin drop
 - Electronic programmable multi-currency/Token drop option.

Integrated WiFi

- Built-in WIFI in every machine
 - Allows you to perform OTA (“Over the Air”) Firmware updates if desired
 - Allows for remote connectivity for programming and real-time alerts – Qtr4 2026
 - Allows for future payment system without the need for card readers
 - No proprietary gateways, use existing WIFI routers
